RE: Building Permit Application 61067
Proposed Sunroom Addition
3574 Sharp Road

Dear Mr. Mrs. Wylie:

This office is in receipt of the above referenced building permit application, but cannot recommend approval at this time.

An inspection conducted by Mark Rifkin on August 3, 1995 revealed a sewage discharge in the vicinity of the septic tank cleanout. Although the proposed addition does not represent an increase in potential flow to the septic system, a recommendation for approval indicates satisfaction with current septic system operation.

Repair of your septic system is necessary in order to recommend approval of the building permit application. This procedure includes a septic system repair permit (\$25 fee) and appropriate inspections by a sanitarian from this office.

To avoid enforcement actions, septic system repair should be completed as promptly as possible.

For further information on septic system repairs, to schedule an inspection or for any other information, please call me at 313-2640.

Very truly yours,

Mark E. Rifkin, R.S.

RE: Building Permit Application B00108⁷³45
9221 Dunloggin Road
Proposed Garage, Office and In-law Suite

Dear Mr. & Mrs. Lewis:

This office has received the above referenced building permit application, but cannot recommend approval at this time because of concerns about the capacity of the existing septic system.

The septic system is believed to have been installed in 1959. Systems installed in that era are significantly undersized compared to modern standards. Additionally, given the number of years of operation, the system on your property would be expected to be at the end of its useful life. Therefore, the septic system would not be expected to be able to accomodate the potential increase in sewage flow from the increase in house capacity (represented by the proposed addition of one bedroom and an office which may be able to be used as a bedroom).

A Health Department recommendation for building permit approval indicates acceptance of the septic system capacity to accomodate the current and potential sewage flow demand placed upon it. This is not possible given the system's limited anticipated capacity. Connection to public sewerage would be required in order for this office to recommend approval of the building permit application.

Also, the well which once served the dwelling may not be properly filled and sealed, and no records are available to provide any additional information. You are encouraged to call this office to discuss proper procedures for this situation. Please contact this office at (410) 313-2640 if you have any questions regarding the septic system or well issues on your property.

Very Truly Yours,

Mark E. Rifkin

RE: Bldg Permit Appl # B0010855
Garage / In-Law Quarters

Dear Mr Rifkin,

As requested, I am forwarding a follow-up letter detailing the prior use of the septic system at the above address, and the proposed use of the in-law suite above the garage.

The original Dwelling at 9221 Dunloggin Rd. was constructed around 1960/61. It is a 2 Bedroom Ranch house with a 750 Gal. concrete septic tank.

From the time it was built until October of 1995, it was occupied by a Mrs. Dorothy Pitt.

Mrs Pitt lived in this house by herself until 1995, at which time my wife and myself purchased the house.

At the time of purchase, I was required to have the septic system certified. I contacted a company owned by Jack Fyock Jr. who sent a representative to the house to do the inspection. The system was cleaned, flushed, recleaned and inspected. I was told the system was very clean and seemed to have been well maintained. It is a 750 Gal concrete tank.

In the two years that I have lived here, there have been no signs of any back ups or failures of any kind.

The proposed in law suite is to be a 1 Bedroom unit with a Bathroom + sitting room above the garage and a storage room or small office on the ground level next to the single car garage.

The intended use of the in-law suite is to have a middle-

price Ranged unit for my sister-in-law to stay when she comes to visit. She is widowed with no children and currently resides full time in a house in Montego Bay - Ocean City.

Her use of the in law suite will be limited to - Two to three months during the winter and an occasional Two to three week visit at various times during the Balance of the year.

I do not perceive the use to cause any over load use to the septic system.

I would not hesitate in the future to connect the the Ho. Co. Sewer system if any problems or failures of the present system occurred.

It is my hope to construct the Addition and connect the sewer line to the existing septic system without the additional expense, excavation and landscaping Required to tie-in to the county sewer line.

Respectfully,

J. E. Lewis
