To whom it may concern,

This is a statement from S&G Tech Group to answer the requested question of "a

statement from the tenant describing the specific use and process that will occur within

the space". We are a 3D printing service company, our entire operation will solely focus

on 3D printing. Given the nature of 3D printing and its unfamiliarity to the public, we

will keep the description as simple to understand as we could.

Our space will have two separated sections, one is our office where desks, chairs, and

computer etc. will be stationed. The other room is named printing area where printers and

everything that are associated with the printer will be kept here. No desks, chairs, nor

other office supplies will be put into printing area.

Our entire 3D printing process can be understood into three different phase. They are pre-

processing, printing, and post-processing. During the first phase, which is pre-processing,

the file or model will go through different software and will be sliced into certain

computer format which printer can access. This process is done via computer in our

office only. Second phase is printing, where we will load the file onto printers and

command the printer to start the job. The last phase is post-processing, when the job is

done, we take the parts out and package them. Sometime we need to using water to bath

the parts in order to get better finishing. Both second and third phase will occur in

printing area.

All the materials in our operations are safe to use and have no specific requirements to

handle. We have no materials that are listed under Table 307.1 of the International

Building Code, 201.

Thank you for your time and please let us know if there are any questions and concerns.

Best,

S&G Tech Group

President: Jinzhen Gu

LICENSES & PERMITS

Little Patuxent Water Reclamation Plant 8900 Greenwood Place Savage, Maryland 20763 410-313-1200 410-313-1207 (FAX)

September 18, 2017

Subject: Discharge from S & G Tech Group Corporation

Dear Owner/Manager,

Upon review of the information provided to our office on September 15th, 2017 by Weiyi Song, we found that there are no pretreatment requirements at this time for S and G Tech Group Corporation in Elkridge, Maryland. There are no Federal and/or State Requirements governing the 3-D printing process that this facility is to implement. If the Federal and/or State Governments institutes regulations or if Howard County Bureau of Utilities does find any infractions with the discharge coming from this location then a re-evaluation of this facility will need to be done.

If there any changes in amount of production and/or processes used then S and G Tech Group Corporation must reach out to the Pretreatment Department for further guidance.

Sincerely,

Gregory Sherman Pretreatment Coordinator Pretreatment Program Direct Line: 410-313-1224 Main Line: 410-313-1227

DIVISION

Reliable professionals delivering customer-focused water services

2 Physical Description

2.1 Configuration

The Stratasys J750 3D printing system consists of the following main components:

- The printer
- The printer computer (built into the printer)
- A printer-server workstation (computer provided by the customer)

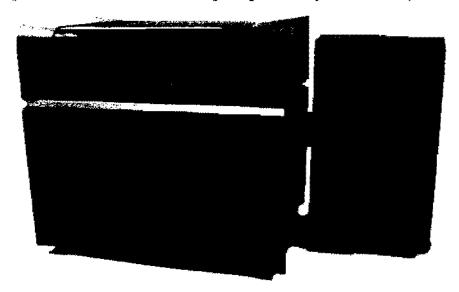

Figure 1 Stratasys J750 printer

2.2 Size and Weight

Table 1 Printer size and weight

6 Electrical Requirements

The customer is responsible for ensuring that all tasks described in this section are carried out by qualified personnel.

6.1 Power

A stable, reliable source of power is required. Power to the UPS (or printer) should be supplied directly from the main electrical panel. The line should not be connected to other electrical outlets.

Printer power rating:

- 100-120 VAC, 50-60 Hz, 13.5 A, 1 phase
- 220-240 VAC, 50-60 Hz, 7 A, 1 phase

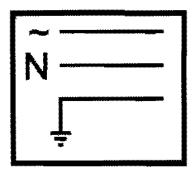

Figure 4 Wiring diagram

If the power ontput at the facilities is different from specified above, contact your Stratasys specialist.

6.2 Circuit Breaker

A Type-C circuit breaker with the following specification is required on the power line (subject to the local electrical code).

The following table lists the requirements for the circuit breaker.

Table 3 Circuit breaker

Vollage	Chools Disease Control of the Contro
100-120 VAC	15 A or 16 A
220-240 VAC	10A

6.3 Grounding

The printer is grounded through a single-phase, AC plug. Make sure that the AC outlet is properly grounded, in accordance with local electrical codes.

6.4 Residual Current Device (RCD)

The wall outlet must be connected to a residual current device (RCD)—also known as a ground current-leakage detector—that protects the circuit from a current leakage of more than 30 mA.

DOC-08015 Rev. C

PolyJet 3D printing material

How PolyJet works

PolyJet 3D Printing works similarly to inkjet printing, but instead of jetting drops of ink onto paper, PolyJet 3D Printers jet layers of curable liquid photopolymer onto a build tray.

The process is simple:

- Pre-processing: Build-preparation software automatically calculates the placement of photopolymers and support material from a 3D CAD file.
- Production: The 3D printer jets and instantly UV-cures tiny droplets of liquid
 photopolymer. Fine layers accumulate on the build tray to create one or several
 precise 3D models or parts. Where overhangs or complex shapes require support,
 the 3D printer jets a removable support material.
- Support removal: The user easily removes the support material by hand, or with water. Models and parts are ready to handle and use right out of the 3D printer, with no post-curing needed.

Classification

This chemical is considered hazardous by the 2012 OSHA Hazard Communication Standard (29 CFR 1910.1200).

Acute toxicity - Oral	Category 4
Skin corresion/irritation	Category 2
Serious eye damage/eye imitation	Category 1
Skin sensitization	Category 1B
Carcinogenicity	Category 2
Reproductive toxicity	Category 2

Specific target organ toxicity (single exposure)	Category 3
Specific target organ toxicity (repeated exposure)	Category 2

Label elements

Danger

Hazard statements

Harmful if swallowed

Causes skin imitation

Causes serious eve damage

May cause an allergic skin reaction

Suspected of causing cancer

Suspected of damaging fertility or the unborn child

May cause respiretory initiation

May cause damage to organs through prolonged or repeated exposure

Appearance Ink cartridge

Physical state liquid

Odor Characteristic

Precautionary Statements - Prevention

Obtain special instructions before use

Do not handle until all safety precautions have been read and understood

Wear protective gloves/protective clothing/eye protection/face protection

Wash face, hands and any exposed skin thoroughly after handling

Do not eat, drink or smoke when using this product

Conteminated work dollning must not be allowed out of the workplace

Do not breathe dust/furne/gas/mist/vapors/spray

Use only outdoors or in a well-ventilated area

Precautionary Statements - Response

IF exposed or concerned: Get medical advice/attention

Specific treatment (see .? on this label)

IF IN EYES: Rinse cautiously with water for several minutes. Remove contact lenses, if present and easy to do. Continue rinsing immediately call a POISON CENTER or doctor

IF ON SKIN: Wash with plenty of water and soap

Take off contaminated clothing and wash it before reuse

If skin imitation or rash occurs: Get medical advice/aftention

IF INHALED: Remove person to fresh air and keep comfortable for breathing

IF SWALLOWED: Cell a POISON CENTER or doctor if you feel unwell

Rinse mouth

Precautionary Statements - Storage

Store locked up

Store in a well-ventilated place. Keep container tightly closed

Precautionary Statements - Disposal

Dispose of contents/container to an approved waste disposal plant

Hazards not otherwise classified (HNOC)

Not applicable

Other information

May be harmful in contact with skin Very toxic to aquatic life with long lesting effects Very toxic to aquatic life

Unknown acute toxicity

21,728 % of the mixture consists of ingredient(s) of unknown toxicity

Description of first aid measures

General advice

Show this safety data sheet to the doctor in attendance, immediate medical attention is

required.

Inhalation

Remove to fresh air. Get medical attention immediately if symptoms occur, IF exposed or

concerned: Get medical edvice/attention.

Eve contact

Get immediate medical edvice/attention. Rinse immediately with plenty of water, also under

the eyelids, for al least 15 minutes. Remove contact lenses, if present and easy to do.

Continue rinsing. Keep eye wide open while rinsing. Do not rub affected area.

Skin contact

Wash off immediately with soap and plenty of water for at least 15 minutes. May cause an

allergic skin reaction. In the case of skin imitation or allergic reactions see a physician.

Ingestion

Do NOT induce vorniting. Clean mouth with water and drink afterwards plenty of water.

Never give anything by mouth to an unconscious person. Call a physician.

Self-protection of the first aider. Avoid contact with skin, eyes or clothing. Wear personal protective clothing (see section 6),

Most important symptoms and effects, both acute and delayed

Symptoms

Burning sensation, Itching, Rashes, Hives.

Indication of any immediate medical attention and special treatment needed

Note to physicians

May cause sensitization in susceptible persons. Treat symptomatically,

Sultable Extinguishing Media

Use extinguishing measures that are appropriate to local circumstances and the

SDS-06124 - VEROWHITEPLUS RGD835

surrounding environment.

Unsultable extinguishing media

CAUTION: Use of water spray when fighting fire may be inefficient.

Specific hazards arising from the chemical

Product is or contains a sensitizer. May cause sensitization by skin contact.

Explosion data

Sensitivity to Mechanical Impact None. Sensitivity to Static Discharge None.

Special protective equipment for fire-fighters

Firefighters should wear self-contained breathing apparatus and full firefighting turnout

gear. Use personal protection equipment.

O ACCESS OF RESIDENCE DESCRIPTION

Personal precautions, protective equipment and emergency procedures

Personal precautions

Avoid contact with skin, eyes or clothing. Use personal protective equipment as required. Ensure adequate ventilation, Evacuate personnel to safe areas. Keep people away from

and upwind of spill/leak.

Other Information

Refer to protective measures listed in Sections 7 and 8.

Environmental precautions

Environmental precautions

Prevent further leakage or spillage if safe to do so.

Methods and material for containment and cleaning up

Methods for containment

Prevent further leakage or spillage if safe to do so.

Methods for cleaning up

Pick up and transfer to properly labeled containers.

Prevention of secondary hazards

Clean contaminated objects and areas thoroughly observing environmental regulations.

Precautions for safe handling

Advice on safe handling

Handle in accordance with good industrial hygiene and safety practice. Avoid contact with akin, eyes or clothing. Do not eat, drink or smoke when using this product. Ensure adequate ventilation. In case of insufficient ventilation, waar suitable respiratory equipment. Take off contaminated clothing and wash before reuse. Remove contaminated clothing and shoes. Avoid breathing vepors or mists.

Conditions for safe storage, including any incompatibilities

Storage Conditions

Keep containers tightly closed in a dry, cool and wall-ventilated place. Keep out of the reach of children. Store locked up.

Control parameters

Exposure Limits

The following ingredients are the only ingredients of the product above the cut-off level (or level that contributes to the hazard classification of the mixture) which have an exposure limit applicable in the region for which this safety data sheet is intended or other recommended limit. At this time, the other relevant constituents have no known exposure limits from the sources listed here.

Chemical regree		Control (SAN) PEL	NAME AND A
Titanium dioxide	TWA: 10 mg/m ³	TVVA: 15 mg/m ³ total dust	IDLH: 5000 mg/m ³
13463-67-7		(vacated) TWA: 10 mg/m3 total	,
		dust	

Appropriate engineering controls

Engineering comtrols

Showers

Eyewash stations Ventilation systems.

Individual protection measures, such as personal protective equipment

Eye/face protection

Tight sealing safety goggles.

Hand Protection

Wear suitable gloves. Impervious gloves.

Skin and body protection

Wear suitable protective clothing, Long sleeved clothing.

Respiratory protection

No protective equipment is needed under normal use conditions. If exposure limits are exceeded or irritation is experienced, ventilation and evacuation may be required.

General hygiene considerations

Avoid contact with skin, eyes or clothing. Wear suitable gloves and eye/fece protection. Do not eat, drink or smoke when using this product. Wash hands before breaks and
