RE:

Variance Approval

810 River Road

Sykesville, MD 21784

Dear Sir:

The Department of Health has received your variance request received September 11, 2008 for the above referenced property. This agency will grant **approval** of the variance to waive the required Percolation Certification Plan as required by the *Howard County Code, Subtitle 8, Section 3.805*. The variance has been approved on the basis that the proposed deck does not increase the wastewater flow from the single family residence and perc testing conducted under application A20482 indicates that there is adequate repair area.

Be advised that any future addition may require percolation testing and a Percolation Certification Plan will be required. Any deviations from the site plan submitted with the request will be subject to further review by this Department.

Any questions regarding this decision may be directed to the Well and Septic Program of the Howard County Health Department.

Respectfully,

Michael J. Davis, R.S.

**Assistant Director** 

Bureau of Environmental Health

Earl R. Kratsch 810 River Road Sykesville, MD 21784 410-442-8260

September 11, 2008

Mr. Michael J. Davis, Assistant Director Howard County Bureau of Environmental Health 7178 Columbia Gateway Drive Columbia, MD 21046

Dear Mr. Davis:

I am writing in connection with my request to Howard County for a building permit to construct a ground level deck (approximately 600 s/f) on the rear of my home located at 810 River Road, Sykesville, MD 21784. In the process of pursuing the permit, I was requested to obtain a stamp from the Bureau of Environmental Health. Working with Mr. Robert Bricker, CPSS of your department, I was informed that I needed to have a perc certification and my 5 acre lot re-perced before a stamp could be provided.

Since my existing septic system is fully functional, pumped every two years and is located in the front of my residence, and the proposed deck in located in the rear with no impact on the septic system, I am respectfully requesting a waiver to the provisions of the Title 3, Subtitle 8 of the Howard County Code.

At this time, I would find the cost related to acquire a percolation certification and to re-percolate my lot to be cost prohibitive, not to mention the disturbance to my horses, fencing and pastures.

Thanking you in advance for your help and consideration in the matter.

Sincerely,

Earl R. Kratsch

## FILE INQUIRY NOTES

DATE	RESULTS OF REVIEW FOR FILE
14	
9/2/02	Site Inspection
	Well has 2-piece metal cap secure
	to top of steel-casing at 18 inches
	so top of see carrior at to menes
	height above soil. A PVC electrical
	conduit was fastened securely in the
	port of the cap.
	Dry well & septic tank are in locations
	as indicated on build termit proposal,
	both in front lawn. The solution level
	in the dry well appeared to be at
	about 4'to5' beneath soil surface.
	No evidence of sewage over-flow
	was observed at either septie touk
	or dry well locations. No evidence
	of subsurface seepage was observed.
	at the septic tank and dry well locations.
