RE: Onsite Sewage Disposal System Required Maintenance

Dear Minerva Contreras:

This is a reminder that the Maryland Department of the Environment (MDE) records indicate that your Best Available Technology (BAT) unit is overdue for its annual maintenance. If service was completed within the last year, you or your service provider may provide our office with documentation and your service provider must update the MDE database. If service has not been completed in over a year, it must be completed as soon as possible and documentation must be provided to our office and the MDE database must be updated by your service provider.

Your onsite sewage disposal system (OSDS) was installed with an advanced pretreatment tank utilizing Best Available Technology for Nitrogen reduction (a BAT unit). This unit, when properly functioning, treats the sewage effluent from your house before entering the soil, which helps protect the groundwater utilized by nearby wells and potentially extending the lifespan of your OSDS. An annual service visit from a licensed service provider is required for these units and must be entered into the MDE database.

Enclosed is a list of MDE certified service providers. The provider must also be certified by the manufacturer of your particular unit. Also enclosed is a contact list of BAT unit manufacturers and local distributors. **Please submit documentation of the annual service** visit to our office, attention Aleetta Taylor, by October 26, 2019. You may contact us at 410-313-1771 or ataylor@howardcountymd.gov with any questions.

Jeff Williams
Well & Septic Program Supervisor

> Please update our records. Our system was cleaned on 11/6/2019.

→ Please see attached.
Thank you.
