John,

As per our conversation, below is the info from Spencer regarding what the county needs from Fogles. Please let us know when you get this permit on Monday. Thanks for your help.

Jane

From Spencer-

The perc cert and septic plan have been approved by the Health Department. We are willing to sign off on the building permit prior to septic work on a couple of conditions. The septic contractor must come to the Health Dept. and pay for the septic upgrade permit, a fee of \$396 (payable to the Director of Finance), prior to Health signing off on the building permit. Once this has been done we will sign the building permit and place a condition on it to not receive final building approval until septic work has been completed and approved by Health.

When the septic work is ready to begin the septic contractor will need to bring a wall check (to scale) showing the elevation of the new foundation in order to prove fall is still available. Once the wall check has been received and everything checks out we will give the contractor the septic plan. During installation the septic contractor will need to contact the Health Dept. for inspections prior to covering up any work. Once all Health requirements have been met the building permit will be released to receive its final approval.

## Hi All,

The perc cert and septic plan have been approved by the Health Department. We are willing to sign off on the building permit prior to septic work on a couple of conditions. The septic contractor must come to the Health Dept. and pay for the septic upgrade permit, a fee of \$396 (payable to the Director of Finance), prior to Health signing off on the building permit. Once this has been done we will sign the building permit and place a condition on it to not receive final building approval until septic work has been completed and approved by Health.

When the septic work is ready to begin the septic contractor will need to bring a wall check (to scale) showing the elevation of the new foundation in order to prove fall is still available. Once the wall check has been received and everything checks out we will give the contractor the septic plan. During installation the septic contractor will need to contact the Health Dept. for inspections prior to covering up any work. Once all Health requirements have been met the building permit will be released to receive its final approval.

## Jeff,

In the meantime could you please send two more copies of the septic tank plan to the Health Dept. I assumed after sending my comments I would be receiving both again.

Robert "Spencer" Freemon Howard County Health Department 8930 Stanford Blvd. Columbia, MD 21045 Bureau of Environmental Health Well and Septic Program Phone: 410-313-6357 Email: <u>rfreemon@howardcountymd.gov</u> Website: https://www.howardcountymd.gov/Departments/Health/Environmental-Health/Well-and-Septic
