#### RE: Percolation Test Date

Proposal: Sand mound percolation testing Property ID: Dailey Property Scaggsville Road Tax Map: 41 Parcel # 85

Dear Mr. Dailey:

Sand Mound percolation testing has been tentatively scheduled for the above referenced property for **Friday, August 11, 2000 at 10:00 a.m.** Please call this office at (410) 313-2640 to confirm your acceptance of this percolation test date(s).

You shall be responsible for having a contractor on site to excavate the test holes at the corners of the proposed sand mound area(s).

In the event of uncertain weather (i.e., precipitation or extremes of temperature), please contact this office prior to 9:00 a.m. on the test date to determine whether or not percolation testing can be performed on that date. If it is not feasible to perform the test, a new test date shall be assigned.

Percolation test results may be expected by mail two weeks after the completion of the percolation testing.

Thank you in advance for your cooperation in this matter.

Sincerely

Donna K. Soe, R.S. Water and Sewerage Program

#### RE: Sand mound percolation test results

Proposal: Establish sufficient septic reserve area to serve existing lot Property ID: Dailey Property Scaggsville Road Tax Map: 41 Parcel #85

Dear Mr. Dailey:

Sand mound percolation testing was conducted on the above referenced property on August 11, 2000. These tests were unsuccessful due to lack of percolation in the most limiting soil layer. As previously indicated, percolation testing for conventional trench systems also failed, as evidenced by the testing conducted on April 7, 2000. Based on these test results, this existing lot has failed for on-site sewage disposal systems.

This preliminary determination is eligible for review. Request for reconsideration should be made in writing and should be accompanied by submission from a licensed surveyor of a percolation test plan showing actual locations and elevations of all excavated test holes and a suitable house and well site. The plan should also include the location of all existing wells and septic systems within 100 feet of property boundaries and all relevant landscape features such as streams and swales. This plan should be submitted within sixty (60) days to allow field verification if necessary.

Short of a successful appeal, remaining options for this site would include:

- Provision of an off-site septic easement
- Provision of public water and/or public sewer
- Provision for tax relief as a non-buildable lot based on recent Health Department findings

Please inform me as to whether or not you wish to continue with the proposal for an off-site septic system or if you wish to request reconsideration of the preliminary determination. If you have any questions regarding this matter, please contact at the address below or by calling (410) 313-2694.

Sincerely,

Donna K. Soe, R.S. Water and Sewerage Program DKS Enclosures Cc: Tax Assessment office file

Property ID:

#### RE: Wet season percolation test date

Proposed Use: Existing lot of record Dailey Property Scaggsville Road Tax Map: 41 Parcel #85

Dear Mr. Dailey:

Wet season percolation testing has been tentatively scheduled for the above referenced property for Friday, April 7, 2000 at 10:00 a.m. Please call this office at (410) 313-2640 to confirm your acceptance of these percolation test dates.

You shall be responsible for having a contractor on site to excavate the test holes at the corners of the proposed septic area(s). Please be advised that previous test holes were located in the vicinity of the proposed septic reserve area designated "alternate 2", with the presence of groundwater in several test locations.

In the event of uncertain weather (i.e., precipitation or extremes of temperature), please contact this office prior to 9:00 a.m. on the test date to determine whether or not percolation testing can be performed on that date. If it is not feasible to perform the test, a new test date shall be assigned.

Please be advised that current groundwater levels are considerably lower than levels of previous years. Therefore, a supplemental buffer shall be added to account for this deficiency in the groundwater levels as part of our judgement of the soil suitability for septic systems. This supplemental buffer shall be applied in addition to that which is dictated by state regulatory standards. Furthermore, information gathered during this limited wet season may be subject to further consideration.

Percolation test results may be expected by mail approximately two weeks after the completion of the percolation testing.

Thank you in advance for your cooperation in this matter.

Sincerely, Donna K. Soe, R.S.

Mr. Michael Dailey 15003 Saddle Creek Drive Burtonsville, Maryland 20866

#### RE: Percolation Test Application

Proposed Use: Existing lot of record Property: Dailey Property Scaggsville Road Tax Map: 41 Parcel #85

Dear Mr. Dailey:

This office has recently received the above referenced application; however, we are unable to assign a percolation test date at this time.

A search of Health Department records indicates that percolation testing was conducted on the property in September, 1983 with no follow-up performed. Those test results indicated the presence of groundwater table at some test hole locations. Therefore, it shall be necessary for the property to be evaluated in the "wet season" of the year (which usually coincides with the spring season). Once a determination has been made regarding the start of wet season, 2000, then a percolation test date shall be assigned.

Thank you in advance for your cooperation regarding this important matter. If you have any questions or concerns, please contact me at the address below or by calling (410) 313-2640.

Sincerely, Donna K. Soe, R.S.

BUREAU OF ENVIRONMENTAL HEALTH TIBER PLACE 8306B FORREST STREET ELLICOTT CITY, MARYLAND 21043 TELEPHONE: 892-2330

\$ <sup>11</sup>

September 6, 1983

Mr. Wilburt E. Dailey 4211 Ammendale Road Beltsville, Maryland 20705

Dear Mr. Dailey:

On September 1, 1983 a percolation test was conducted at your 2.04 acre property in the Brady Subdivision on Route 216. Due to the presence of groundwater in the area tested it will be necessary to continue the test in the "wet season" before a decision can be made on the suitability of this property for a sepcie disposal system. The "wet season" is determined by the fluctuations of the water table, but generally occurs between the dates of February 1st and April 30th. If you wish to continue the test at that time please contact this office near that time to schedule an inspection.

If you have any questions relative to this matter, please contact me at 992-2330.

Yours truly, Crai W. Quan

Craig Williams, Sanitarian Water and Sewerage Program
