(Name)

This form is for the processing of final plat originals for signature approvals. If it is found necessary for any corrections or additions to be made on the original, the corrections needed must be stated and forwarded to the next agency, minus the signature, and then returned to the Office of Planning and Zoning for processing. All or any revisions required to the final plat original will be compiled and forwarded to the owner to enable the owner's engineer to make the revisions at one time or to contact the appropriate County agency on questions concerning such revisions.

RE: Noranbrock Property
Tax Map 2, Parcel 104
Lot 1 and 2

Dear Mr. Noranbrock:

On July 23, 1985 a repercolation test was conducted on the above referenced property. The test revealed unsatisfactory soil conditions on Lot Number 3, showing severe rock formations at shallow depths. On Lot Number 2, soil conditions were found satisfactory on the area tested. However, the area tested on Lot 2 is the highest area and does not provide for an adequate house and well site as designed.

If a suitable house and well site can be established on Lot Number 2, that is, a site higher or equal in elevation and at the minimum distances as stated in COMAR 10.17.02, then the percolation test can be approved. Submission of the plat meeting the above requirements must be by a registered engineer or licensed surveyor.

If you should have any questions concerning this matter, please feel free to contact me at the above address or by calling 461-9933.

Very truly yours,

A handwritten signature in cursive script that reads "Craig Williams".

Craig Williams, Director
Water and Sewerage Program
