**RE: PERCOLATION TEST RESULTS**  
Application #A50971  
Proposed Adjustment to  
Approved Sewage Easement  
Breezewood Farms II, Lot 25  
Breezewood Circle

Dear Mr. Szeliga:

Percolation testing conducted November 27, 1995 on the above referenced property indicated limited satisfactory soil conditions. Copies of the percolation test results are enclosed.

Further review is contingent upon submission by a registered engineer of a percolation certification plat showing actual locations and elevations of all excavated test holes and a suitable house and well site. The plat should also include the location of all existing wells and septic systems on the property as well as the location of any other relevant features such as streams, swales, or existing structures. A note must be included certifying that all wells and septic systems within 100' of property boundaries have been shown. This should be submitted within sixty (60) days to allow field verification if necessary.

The proposed well site is suitable and the approved construction permit has been mailed to the driller. If you have any questions regarding this matter, please feel free to contact me at the above address or by calling 313-2640.

Very truly yours,

Craig Williams, Program Director  
Water and Sewerage Program
