Re: Septic Repair
14350 Dorsey Mill Road
Glenwood, Maryland 21738

Dear Mr. and Mrs. Wolcott:

Your letter requesting a repair to the septic system for the above mentioned property has been received. You indicated that you wish to relocate the septic tank to accommodate a planned garage addition that might also involve an additional bedroom.

In order to accomplish this objective, this office needs to be satisfied that not only is your existing system of adequate size, but that sufficient area exists for future repair of the system. As the available percolation test records are insufficient for this purpose, additional testing is required.

A repair percolation test can be scheduled to determine what repair area is available. At the time of the test the proposed building corners and proposed location of the new septic tank should be clearly marked. Once the repair sewage disposal area has been defined, review of the proposed addition and septic tank location can be completed.

Your \$10.00 fee can be used for the repair percolation testing and would include a new tank/trench installation inspection.

Please contact this office at 461-9933, Monday through Friday, between the hours of 8:30 a.m. and 4:30 p.m. to arrange for a test date.

Thank you.

Very truly yours,

Jane E. Nadeau

Subject: Repair & Replacement of Septic Tank

Dear Sir,

Enclosed is a site plot survey of my current resident. My family and I are planning to upgrade our existing septic tank, (1000 Gal), to a new location in our yard, and at the same time increase its size to 1250 Gal. This is in anticipating our future "new" structure of a porch and 2 car garage. Our current house has 3 bed rooms, and 1 1/2 baths. If for any reason we would like to add a 4th bed room, we would like to have a system ready to handle it.

Our contractor is "Fogle's Refuse & Septic", Dale is our contact at (301)795-5670.

Please review our plans for a county repair permit, and mail it to our address. Thank You.

Above person has some questions
about the above property

8/24/90 4:24 PM

B. Hodges

Addition to house w/ 1 bedroom.
13 ft to septic tank off house. Want to
move tank. Need perc's to provide new
repair area. Septic area unrecorded.

8-27-90

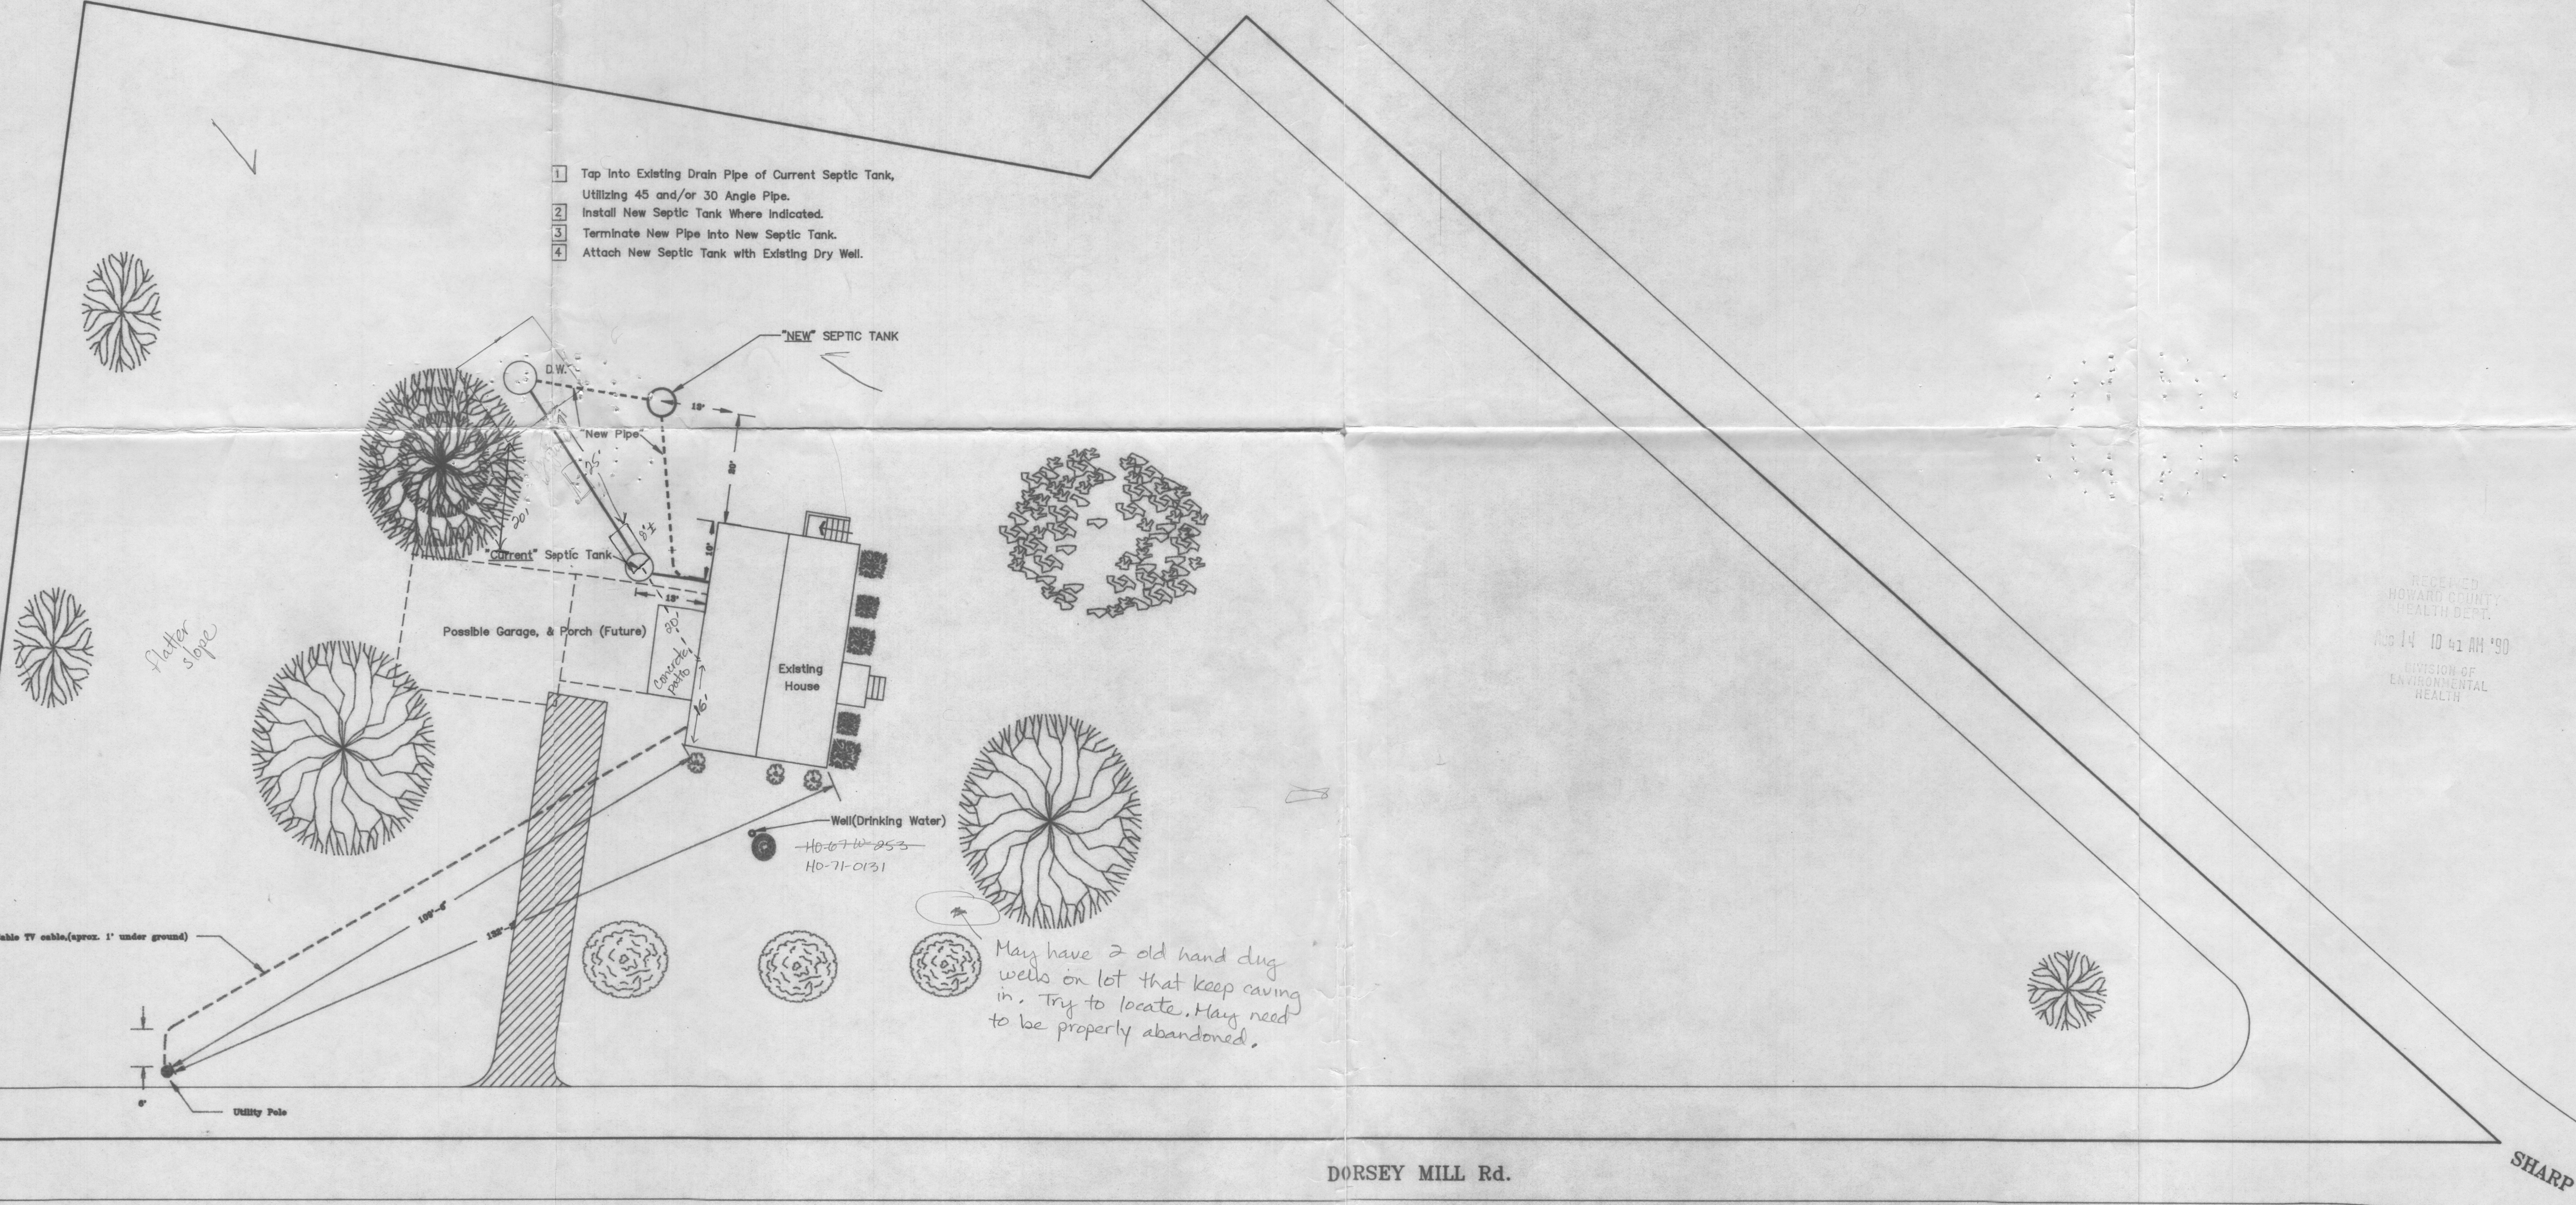

Returned phone call to
Mrs. Wolcott. Inspect lot
carefully at time of perc tests.
May have 2 hand dug wells
which need proper abandonment.
Wolcott will call to schedule perc
date for early Sept. JENadeau

8-27-90

Very limited site for septic repair area. Slopes fall toward drywell from rear & left lot lines. Area to left of addition is flatter but may have a lot of deep roots from trees shown on drawing. No cleanout on septic tank. Owner thinks it is buried deep or possibly underneath concrete patio. DEN.

SHARP Rd.

- 1 Tap Into Existing Drain Pipe of Current Septic Tank, Utilizing 45 and/or 30 Angle Pipe.
- 2 Install New Septic Tank Where Indicated.
- 3 Terminate New Pipe into New Septic Tank.
- 4 Attach New Septic Tank with Existing Dry Well.
