The Howard County Health Department recommends issuance of the demolition permit for the old residence at 13741 Frederick Road.

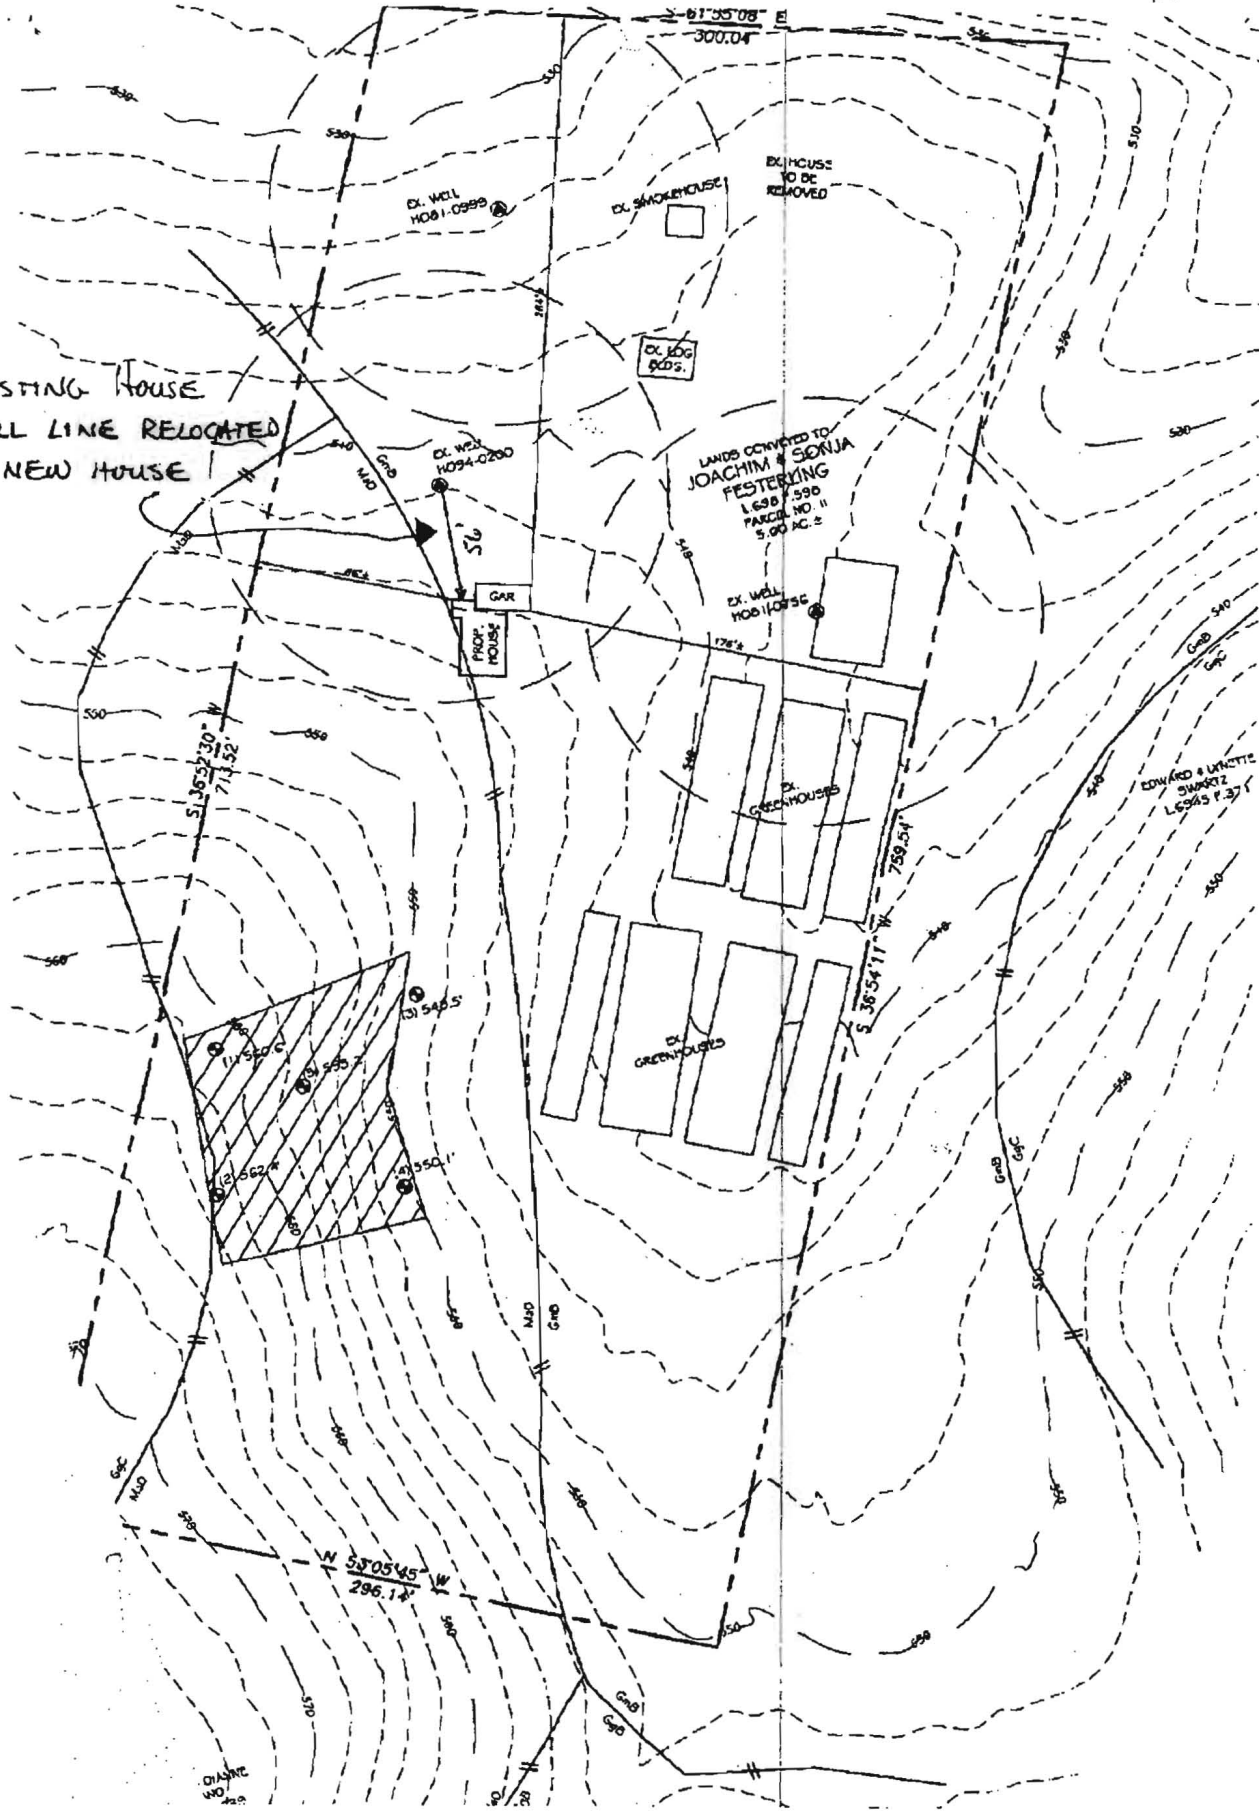

The hand dug well for the old residence has been sealed. The well for the new house and the two agricultural wells need to be protected from damage during the demolition.

Any existing septic system components that served the old house, such as a drywell or septic tank, must be pumped out by a scavenger truck and filled with dirt or other suitable materials.

Please call our office if any additional wells or septic system components are found during the demolition.
