**Re: Percolation Test Results
#A529489
13224 Triadelphia Rd**

Dear Ms. Ottery & Mr. Norris,

Percolation testing was conducted at your property on July 31st, 2008 in response to a future building permit application for an addition of a half bathroom to the existing barn on your property. Percolation testing yielded sufficient results indicating satisfactory soil conditions for conventional onsite wastewater disposal and adequate septic system repair area to support the proposed bathroom. Three test holes were dug in the vicinity of the originally proposed septic area. Field data collected is shown on the percolation test worksheets enclosed with this letter. Acceptable ranges for recommended inlet and trench bottom depths, and usable sidewall have been provided, and may be confirmed at time that a system upgrade or replacement is installed.

The Health Department will require that the septic work be completed prior to building permit approval. The existing septic system appears to be functioning properly at this time. During testing the effluent level in the existing drywell was observed to be satisfactory. A septic permit with the system specifications can be obtained from our office Monday thru Friday 8am to 5pm. There is a septic permit fee of \$165 (checks made payable to the Director of Finance).

If you have any questions regarding this matter please contact the Well & Septic Program at (410) 313-1771. You may also contact me directly at (410) 313-6287.

Sincerely,

Heidi Scott
