Good seeing you on site.

Based on my site visit today, I would recommend a modified drip dispersal system on the landscape we explored.

Additional Ksat testing with permeameters may be required.

Please send the owners the list of designers you have.

Thanks

Steve,

We ran into a trouble spot out at 11703 Wayneridge Court in Fulton, MD. Dense moist firm clay loams opened up to a decent sandy clay loam at 9', but was very wet and there was medium prominent redox in the soil horizon just above that. Water seeped out of test pit wall at 10.5'. There are light signs of redox at 30", but we got a 10m rate from a perc hole dug at grade.

The homeowners say that the rainwater from the court drains on their yard; clear sediment buildup visible in the drainage swale. The existing drywell is under positive hydraulic subsurface pressure and will surface at a prob poke at 2' to grade. Sewage is not backing up into the house. But the drywell does yet not look like a natural spring.

The homeowner is aware that their soil and existing well arcs are trending towards Non-Conventional and I&A system. Lets meet out there to get system options for this house. When is your next available time slot?

Thanks,

Joseph C. Cabahug – REHS/RS LEHS II

Cc: Williams, Jeffrey
Subject: RE: Innovative Systems Agreement for 11703 Wayneridge Ct

Importance: High

Gentlemen,

What happened with this Agreement? It has just made it to my in-basket and there is no documentation of MDE/Health approval, ¹no drafted septic permit, ²no documentation of Canaan Valley approval for \$13,383, ³no applicant's signature on the perc application, ⁴no date stamps on the plans, and no auger hole field notes/profiles from Steve's site visit on 5/10/21 in the area of the drip system.

This property was originally tested on 4/21/21 with follow-up by Steve on 5/10/21. I don't see any comment letters, date stamps on the plans, or any notes in the file to determine why this took around 10 months from the time Health received the application and there is still no approval. I need an explanation and the missing details before I sign the agreement.

Mike

Morning :)

So I went to the office on Monday to get the signature for the paperwork.... the director was not in that day so the lady in the front desk told me to leave them so she can get them taken care of... She also told me that she would call me when they were ready to pick up but I have not heard from her yet.

Will you please look into it? I would like to take care of it this week and have it recorded.

Thank you for your help

Hello,

We have expended all of our current funds but are accepting applications to be placed on a waiting list. We have requested additional funds and expect to know what we have available shortly after the first of the year. I have attached an application for you to fill out and return to me to be placed on our waiting list.

I have also cc'd Jeffery Williams with the Howard County Health Department. His office will need to verify that your existing system is failing.

Thank you and Please let me know if you have any other questions.

Sincerely,

Kristin

Hello Ms Mielcarek

This is Rieko Yumoto and our house is located in Fulton, Howard Co Maryland. Our septic system, drain field in particular has failed. The county came to perform the Perc test but it didn't pass and hit the water table on 16ft. We have contacted the septic engineer and the design should complete soon.

I am wondering if you guide us how to apply for the grant for the tank. I heard that you could apply for it to failed septic system.

Thank you for your assistance

Kevin/Steven;

Attached is the DRAFT Design and Design Report for Wayneridge Court. I will send out a single paper copy of the Plans only for your initial review. Once we taken care of any comments we will provide multiple FINAL paper copies of both. Thanks!

Respectfully submitted;

Hello
This is Rieko Yumoto 11703 Wayneridge St, Fulton, MD 20759.

Could send me the Parc test result, soil sample test, GI.... something test result to send it to the designer?

Thank you

Rieko

Hello Mr. Yumoto,

The Maryland Department of the Environment recommends a Percolation Drip System for your repair septic system.

Attached is a list of system designers that can design a Drip system for you.

Please reach out
