Hello Ms. Trevey,

This office is in receipt of a building permit application to install an 20' x 40' inground pool and 3'x8' spa. Prior to approval of this building permit by the Health Department, the following is required:

1. **Perc testing to establish a sewage disposal area (SDA) on the property for future septic system repairs.**
2. **An approved percolation certification plan from an engineer.**

The process starts by submitting a percolation test application, a perc test plan from an engineer and fee. Please see attachments for more details about our building permit review process along with list of engineers and septic contractors to assist you.

Alternatively, the homeowner may try asking for waiver to the aforementioned requirements by addressing a letter to the Deputy Director Jeff Williams. In the letter it must state that you are requesting a waiver to the percolation certification plan requirements, and it must be signed by the homeowner. You may include any reasons for the request. Some reasons may include that it's a large parcel with enough area for repairs, or that some perc test data already exist in the record etc. You may send the letter to me as a pdf attachment. The waiver review process may take up to 10 working days once the request has been received by this office.

Should you have any questions, please don't hesitate to ask.

Thanks,

Hank

2/13/24*

Dear Deputy Director,

We are writing to you to request a waiver to the percolation certification plan requirements for the Kay residence, located at 1172 Day Rd. This parcel is large enough to account for future repairs that may be needed. We also had an engineer review the plans and he believed adding a pool would still allow for future relocation of the septic should any changes need to be made later, as the property is large enough for this to be done in a separate area, outside of the proposed pool location. We are asking that you please waive the percolation certification requirements for now. I have attached a copy of a site plan, showing the proposed pool. Please note, there is still a very large area behind the proposed pool, with plenty of space for future repairs. If you take a look at the pool setbacks, there is still 375' from the pool to the nearest rear property line and even more room to the furthest lot line. Should you have any questions, please feel free to call or email me to discuss. My contact information is below.

Sincerely,

Chelsea Trevey, Design Consultant
