Narrative Text	BC2 was alerted for reported structure fire. Responded and AOL to relatively large house with heavy volume of fire blowing out of front door. BC2 established Manor Lane Cmd on side A and structured an organization to address the impending emergency. The fire attack was orchestrated primarily by E5 OIC (Shannon) assigned as Fire Attack supervisor. Units were inhibited by an early collapse of a portion of the first floor into the basement but managed to contain and control the fire while incorporating both primary and secondary searches. One FF (Lt Dushanko) was treated for probable heat exxhaustion. Upon fire out, FID units assisted by ops in removing a large amount of debris from the structure. JD2564 P75

Narrative Text	Second arriving engine. E91 had already covered the hydrant . Proceeded back Manor Ln and assigned to work under fire attack. Driver dressed out and E52 kept two firefighters at the front door on a handline and officer and driver took 1 3/4" handline in the door off of the balcony on the Bravo side of the building. Extinguished fires on the first floor and were joined by the rest of the crew. Completed a primary search of the first floor with the exception of the area on the Delta end of the house which was accessed from the outside due to the burnt out area in the floor. Remained on scene and assisted with overhaul and the fire investigation. Relieved on the fire ground by C shift. JIL #1865

 Narrative Text BC2 was alerted for reported structure fire. Responded and AOL to relatively large house with heavy volume of fire blowing out of front door. BC2 established Manor Lane Cmd on side A and structured an organization to address the impending emergency. The fire attack was orchestrated primarily by E5 OIC (Shannon) assigned as Fire Attack supervisor. Units were inhibited by an early collapse of a portion of the first floor into the basement but managed to contain and control the fire while incorporating both primary and secondary searches. One FF (Lt Dushanko) was treated for probable heat exxhaustion. Upon fire out, FID units assisted by ops in removing a large amount of debris from the structure. JD2564 P75
