## **HOWARD COUNTY GROUTING PROCEDURE**

Boreholes will be grouted from the bottom to the top via a tremie pipe and positive displacement pump. Bentonite grout, known as Quik-Grout will be used according to the manufacturer's specifications to achieve a consistency of at least 20% solids (24 gallons potable water/50 lb. sack of grout) and a permeability no more than  $2.5 \text{ E}(-08) \text{ cm/sec}$ . Grouting will be completed immediately after installing the geothermal loop and no later than twenty-four (24) hours after installing the geothermal loop. Open boreholes/annular space will be protected as necessary to prevent the entry of surface water or pollutants.

I don't have the exact measurements to place them on the plan. They are on my site drawing and we are well over 100 feet away. I ran out of tape on my 100' tape. They are all visible on site

It's well over 50'; I'm on the adjacent side. This is a big property. Have you been there yet?

Thanks Wes, do you have the actual distance to the water line? If not and it's marked, I can put the measurement on the plan with your permission.

Also, I'll have to check with Kevin about the property lines later.

Best,

Attached is the as built plat for the property. It shows the water line. There are no property lines close enough to measure due to the slopes. Let me know if this helps you out. It's a large property.

Good Afternoon,

I'm currently reviewing your geo-well application for 3534 Church Rd, can you comment on the following:

Is this the closest property line? Can you draw where it's located on the site plan (see attached)?

What is the distance between the public water line and geo-well, is the water line marked?

Best,
