I said the ~~Scale~~ Scale was off
on the latest version of
the site plan. He has the
distance of the lp tank to the
house as 70' but on the scaled
plan it should be 60' -
Said that I'd do a site
visit and if it measures
at 70' away from the
house then it's off the property.

WHY CHOOSE QUALITY STEEL UNDERGROUND TANKS?

- 120 - 1,990 WG CAPACITY
- General Specifications
 - Conforms to the latest edition of ASME Rules for Construction of Pressure Vessels, Section VIII, Division 1.
 - Complies with NFPA 58.
 - Vessels shipped with durable ready-to-bury coating. Vessels, depending on manufacturing location, are either powder coated with phenolic epoxy or primed with liquid epoxy and coated with liquid epoxy top coat - both providing a durable ready-to-bury coating.
 - All vessels are shipped vacuum pre-purged to enable simplified first fill of the vessel.
 - Green composite dome provides large working space and is resistant to the elements. Anode stud attached to riser pipe to enable ease of cathodic connection.
- Family & employee owned
- Financing and leasing available
- Customized delivery programs available

HOW DO I FIND MY SALES REP?

Visit our website, www.QualitySteelCorporation.com to view a list of our reps. Once on our site you'll be able to choose the Commercial options and from there you'll be taken to a list of US states where you can choose your location and view the contact information for your local sales rep. If you don't see your sales rep, please give us a call at 800-345-2495.

Our manufacturing locations are strategically located to help serve your tank needs.

Subject: RE: LP Tank Install Prior to the Release of the Permit - 5236 Green Bridge Rd - B24003221
Attachments: State variance application-interactive.pdf

Hello Matt, I've attached the State variance form for your convenience. This is to request a waiver to the 100' setback requirement in the State COMAR code for well construction: Title 26 Subtitle 04, Chapter 04. The specific code reference is 26.04.04.04 B(2)(d) and states that the well must be 100' away from any identifiable sources of contamination. I've also reached out to our Deputy Director for guidance on the lp tank location in relation to the property line. Since the lp tank is already buried and very close to the property line you'll need to prove to DILP that the tank is fully on the property. Please provide a scaled plan showing the location of the lp tank and its orientation underground, the property lines and setbacks to the well and septic system on the property. Once we have the completed waiver form and confirmation that the lp tank is fully on the property, the Health Dept will send the variance request to MDE. Thank you.

Ryan

Spoke with the customer this morning and he would like to try and get the variance. He likes the location of the tank and would like to leave it there. He doesn't really want to move it any other place because of future plans and what not. Let me know what we need to proceed

Subject: RE: LP Tank Install Prior to the Release of the Permit - 5236 Green Bridge Rd - B24003221

Good Morning Matt, as I explained last week, the setback for the underground propane tank is at least 50' you're currently at 37'. Additionally, with the poorly hand drawn site plan you submitted which doesn't show property lines, it's impossible to tell if the lp tank has been installed on or off the property.

I spoke to the homeowner regarding the matter and if you'd like to request a variance for the current location, it will need to be reviewed by MDE officials because the minimum setback to the well has not been maintained. Otherwise, the lp tank will need to be relocated. If you're going to relocate it, please submit a revised scaled plan showing the new location of the propane tank. The setback to any septic component is 5'. The setback to the well is 100' (but can be at least 50' which is a waiver set in place for lp tank building permits being installed on properties with well and septic in Howard County).

Hello, I wanted to let you know that Dixie Land Energy installed the LP tank for the above reference property before the release of the permit from DILP. Additionally, the setback to the well wasn't maintained so Health will be investigating further. Thanks.

Subject: LP Tank Install Prior to the Release of the Permit - 5236 Green Bridge Rd - B24003221

Hello, I wanted to let you know that Dixie Land Energy installed the LP tank for the above reference property before the release of the permit from DILP. Additionally, the setback to the well wasn't maintained so Health will be investigating further. Thanks.
