Subject: 6505 Heather Glen Way pavilion

Hello. I reviewed the waiver request to move the proposed pavilion at 6505 Heather Glen Way inside the 5' setback to the sewage disposal area. I have a few questions related to this waiver request:

- The waiver request says they are the owners at 6506 Heather Glen, the building permit application says 6505 Heather Glen Way, and our records for lot 12 are 6505 Prestwick Dr. I want to confirm that we are talking about Willow Pond lot 12 here?
- The permit application and plans do not address the proposed floor material of this pavilion. Is it a concrete slab? Pavers with crushed stone base? Grass?
- The waiver request mentions that the owners would ideally like the pavilion in the spot where the playground was located. I want to clarify what location is being requested and what might be approved with a waiver. Are they asking for the pavilion to be in the location of the playground with this request? Looking at the aerial photos and the septic install as-built drawing, the playground appears to be well inside the sewage disposal area and over the current trench locations. I want to make sure they understand that location is not possible with a waiver and that is not what they are asking for now.

Depending on the answers above, I may be open to a reduced setback to the sewage disposal area. Please note that a request to move the pavilion inside the sewage disposal area is not possible via the waiver process. If they want to pursue that route, they would need to pursue revising the sewage disposal area to carve out the portion requested. If they want to pursue this option, I can give a better answer of what distance from the trenches I am open to once I get an answer to the questions above. Please also note that any revision to the disposal area to get the pavilion closer to the trenches would also require them to have a contractor accurately field locate the closest trench in its entirety before any waiver review or approval. Thanks

Jeff Williams

From: Alison Hays, Owner of 6506 Heather Glen Way

To: Director of the Bureau of Environmental Health, Howard County Health Dept. Michael Davis

Re: Pavilion Build, Permit# B23003991

Dear Mr. Davis,

I trust this letter finds you well. We recently received our permit to construct an 18x18 pavilion in our backyard, and we greatly appreciate the thoroughness of the Health Department's review process.

Upon closer inspection, we discovered that the proposed location of the pavilion conflicts with the septic easement area. Regrettably, this means we will not be able to utilize the level area where the old playground once stood, as initially envisioned. Consequently, the pavilion is now marked to be partially built on the sloping grade between it and the house.

Understanding the importance of adhering to regulations and guidelines, we fully respect the 5' setback requirement from the septic easement. However, we find ourselves in a situation where adhering strictly to this setback would significantly compromise the functionality and aesthetics of the pavilion.

Considering the above, we are formally requesting a variance to allow us to move the pavilion closer to the edge of the septic easement, deviating from the required 5' setback. The attached septic layout plan provides a detailed depiction of all impacted components, allowing you to visualize the proposed changes more effectively.

As you review our case, we kindly ask for your consideration not only of the requested 5' variance but also the possibility of permitting the pavilion to move even closer to the "trench line." Every foot gained in this adjustment is a significant improvement for us and would contribute greatly to the overall functionality of the pavilion.

We understand the importance of maintaining the integrity of the septic system and ensuring compliance with regulations. Rest assured, any adjustments we make will prioritize the long-term well-being of our property and the surrounding environment.

Thank you sincerely for your time, consideration, and dedication to ensuring the safety and compliance of our community. We look forward to the possibility of working together to find a solution that meets both the regulatory requirements and our family's needs.

Sincerely,

Alison Hays

Hi Melanie

I have attached a letter from the owner addressed to the director asking for the waiver we've been discussing. If you would deliver this to him we would greatly appreciate it.
Thank you for all your help.

Thanks,
Nick Thompson

Good morning Nick,

I Apologize for the delayed response as I was out of the office since last Thursday, but I would be happy to take a look at the plan today. Also, if they are looking for a setback reduction to the SDA that would require a waiver request letter addressed to our director Mike Davis from the homeowner stating the details of why they are seeking this variance. After I look into both the impacts of the project to the septic and the plan I will be able to provide further guidance. Thank you kindly!

Hello Melanie

Attached is a septic plot you had sent me to help with the above mentioned pavilion permit.

The owner is now asking if we can move the pavilion 5' further toward the septic easement (down the hill to avoid grade issues on the upper end).

I took good measurements to confirm the septic components and marked the new proposed location of the pavilion.

Is it possible for you or someone in your office to review the new location and explain if this is a possibility and if there is a variance process we need to pursue.

As always, thank you for your time.

Thanks,
Nick Thompson

Hi Melanie

We did a layout for the proposed pavilion given the plot plan dimension in relation to the drain-field area. The owner is not happy with the location. They would like to explore the waver process to try to get the pavilion as close to the drain-field area as possible.

Can you please explain and/or guide us to the process for this waver?

Thanks,
Nick Thompson

Good morning,

Thank you for providing the distance from the project to the SDA area. Also, we need a measurement from the project to the septic tank and this is a 5ft minimum setback distance requirement as well. The septic permit I attached in my previous email provides the information for the 2000 gal. septic tank and distance from the house to the tank. I hope this is helpful and let me know if you need me another copy as I realized it was sent to the general mailbox rather than your personal email. Have a great rest of your day and thanks again.

Good afternoon,

Please see attached copy of the septic records for Lot 12 in the Willow Pond subdivision. These two plans should support determining the appropriate distances and location of the septic system/sewage disposal area (SDA) to ensure that the setback distances are being met for the proposed pavilion. Let us know if you have any additional questions and hope you have a wonderful evening.
