re: Proposed Addition to Dr. Viener's Residence
7648 Woodstream Way, Laurel

Dear Ms. Nadeau:

Thank you for taking the time to meet with me last Thursday and for finding the 1982 file on this house. Based on our talk, I have drawn some sketches which show the existing sewage disposal system and the proposed system. Before we can proceed any further, we wanted to ask your reaction to the new plan. Perhaps when you have had a chance to look the sketches over, we could meet again.

As you can see, the existing drywell would fall within 20' of the addition. Unless you feel it could continue to be used, we would abandon it. A distribution box and trenches would be built generally as shown. Please note the way that I have proposed to enlarge the drainfield. I'm basing this design on the contours and on the perc tests which are on file. Assuming that we would need more perc tests, where would you want them?

After I met with you, I checked on the availability of public sewer to the property as you suggested. I saw Diane Cerkowicz in the Utility Design Division of Engineering. She consulted the master plan for sewers. The property is in the Metro sewer district, but it is scheduled for "comprehensive" sewer service. She said that this meant 10+ years until any consideration of a sewer line. As you can see from the enclosed copy of the sewer map, the closest available sewer lines, are nowhere near Dr. Viener's property. Ms. Cerkowicz was quite certain that it would not be feasible to consider a sewer line for this property. May I assume that your office would agree?

Again, I really appreciate your assistance. We want to have this preliminary review so that many hours of architectural design will not be wasted on a plan which may not be practical. I will call you in a few days.

Sincerely,

Bruce A. Rich

6-25-91 Met with Mr. Rich re: relocation of addition in order to maintain use of drywell. Dr. Viener plans to re-perc lower area for replacement of SDA used by proposed building addition. JEN
